

2005 Annual Meeting ~ Archives In Binary: Electronic Records, Digital Surrogates, and Business as Usual

While archives will always include traditional media, “born digital” electronic records and patron demand for digital surrogates of archival resources are increasingly expanding the nature of archival work. Storage, preservation, access, reference, and the human resources that create and manage these digital collections are all impacted by the growth of a technologically-dependent world. This year’s annual meeting will explore the implications of electronic records and digitization and suggest practical solutions for tackling what can be an unfamiliar and overwhelming body of material.

Mark your calendar now for **November 2-4, 2005!** The 36th Annual Meeting of the Society of Georgia Archivists will take place in Augusta, Georgia.
